

ALFA TECHNICAL INDUSTRIES LIMITED

ENVIRONMENTAL POLICY

It is the stated intention of the management of the Alfa Technical Industries group of companies (Alfa Chemicals, RIW, Clydebridge Chemicals) and associate company Gattefosse UK, that their operations and products will cause as little harm to the environment as possible. Any detrimental impact on the environment will be minimised, with waste being reduced or recycled wherever possible. The company will respond to any publicly expressed concern, providing information to assist in understanding the environmental impact of its operations.

The environmental impact of existing products and processes will be continually assessed with a view to replacement / substitution to minimise their impact on the environment.

Environmental impact of all new products, or processes, will be assessed prior to their introduction. It is the intention of the company to follow current legislative guidelines on environmental issues. Products and processes with low environmental impact will be encouraged.

A greater awareness of the environmental effects of company products or processes will be promoted through training.

This policy will be reviewed on a regular basis.
